

What

OTTA Seal is a thin bituminous surface treatment (BST) made by using graded aggregate (rock) on top of a layer of oil. The rock is then rolled to create a seal.

When

Anticipated project time frame
June 1 - July 15, 2024.

Where

Streets that are marked in red on the map in this brochure.

Questions?

Call Keltic Engineering at (208) 743-2135 or come to the Town Hall discussion on June 5, 2024 at 6:00pm at City Hall.

Things to Remember

- Streets will be closed for a short time while oil is being applied.
- You can drive on the streets. Please drive **SLOWLY** to avoid splatter & rock chips.
- Minimal dust will be experienced and less throughout the summer as the seal cures.
- Please avoid turning sharply or using heavy equipment on the affected streets.

Thank You

This project will improve our gravel streets and help with future road maintenance!
